

DERMATOLOGY

SPECIALTY CATALOG

SCISSORS • SUPERCUT

SuperCut Scissors are manufactured with a razor edge on one blade and micro serrations on the other blade. The razor edge blade is designed to provide a smooth, precise and less traumatic cutting of tissue and the micro serrated blade is designed to reduce slippage of tissue within the blades of the scissor. The SuperCut is only recommended for tissue not for suture or gauze. **SuperCut Scissors are designated by Black Ring Handles.**

IRIS SCISSORS • SC

SCISSORS • TUNGSTEN CARBIDE

Tungsten Carbide (TC) Scissors are manufactured with Tungsten Carbide Inserts in the blades of the Scissor. Tungsten Carbide is much harder and longer lasting than Stainless Steel and is designed to provide a longer lasting sharp edge on the Scissor blade for many years. Tungsten Carbide Scissors are designated by Gold Ring Handles.

NEEDLE HOLDERS • TUNGSTEN CARBIDE

Tungsten Carbide (TC) Needle Holders are manufactured with Tungsten Carbide Inserts in the jaws of the Needle Holder. Tungsten Carbide is much harder and longer lasting than Stainless Steel and provides sharper teeth which are designed to provide a more precise and secure grip on the needles. Tungsten Carbide Needle Holders are designated by Gold Ring Handles.

TISSUE FORCEPS • TUNGSTEN CARBIDE

Tungsten Carbide (TC) Tissue Forceps are manufactured with Tungsten Carbide Inserts in the tips of the Forcep. The TC platform is in front of the 1x2 teeth on the distal tip and is used to provide a secure grip of the needle, suture or tissue. Tungsten Carbide is much harder and longer lasting than Stainless Steel. **Tungsten Carbide Tissue Forceps** are designated by Gold on the proximal end of the Forcep.
